OPTO-ELECTRONIC PROTECTIVE DEVICES

OVERVIEW OF THE PRODUCTS

Safety laser scanners, safe radar sensors, safety light curtains, multiple light beam safety devices, single-beam photoelectric safety switches, mirror columns and device columns

SICK
Sensor Intelligence.

OPTICAL PROTECTION – FOR MAXIMUM FREEDOM OF MOVEMENT AND PRODUCTIVITY

Opto-electronic protective devices are the first choice for implementing maximum productivity for machines and plants. Unlike fences and doors, they do not limit during handling or material transport and provide a better view in the machine room. The broad portfolio comprehensively meets the requirements of hazardous point protection, access protection, and hazardous area protection. Coordinated complete systems can be built using a SICK-specific interface.

safeRS

Safe radar system for hazardous area protection in raw environments

Technical data overview	
Protective field range	4 m
Warning field range	4 m
Field of view (wide)	110° (horizontal plane) 30° (vertical plane)
Field of view (thin)	50° (horizontal plane) 15° (vertical plane)
Recording method	FMCW radar for detecting movement
Response time	100 ms
Integration in the control	Local inputs and outputs (I/O)
Performance level	PL d (EN ISO 13849)

At a glance

- Modular system for adjusting to your protection tasks up to Performance Level d / Category 2 / SIL 2, in accordance with ISO 13849-1 and IEC 62061
- Extended hazardous area protection thanks to three-dimensional protective field
- Very high machine and plant productivity, even under harsh ambient conditions
- Reliable use even at extreme temperatures
- Radar sensors with long cleaning intervals
- Quick and easy commissioning

Detailed information → www.sick.com/safeRS

- Enclosure rating IP69K offers high resistance and long service life, making it more economical
- Certified material resistance for maximum reliability
- The ideal design for efficient cleaning in the food industry – it ensures high process and production quality while reducing the risk of contamination
- Replaceable protective housing offers flexibility and saves money in the event that service is needed
- Breathable membrane ensures the highest availability
- Reduction of cleaning times and costs compared to a mechanical protective device

- Maximum reliability when constantly exposed to shocks and strong vibrations
- No abrasion-related wear and tear thanks to glued optics module
- High availability: three different scanning ranges can be selected, which avoids interference between the individual light curtains and allows the machines to be positioned close to each other.
- Quick commissioning thanks to integrated LED display and automated measurement of the protective field width
- Very durable thanks to IP65 and IP67 enclosure ratings; withstands ambient operating temperatures down to –30 °C

- Uniform housing and accessory concept for standard and special industrial environments saves time and money when planning systems
- Innovative bracket concept for easy mounting saves installation time and costs
- No blind zones for very high flexibility and space-saving machine design
- Quick installation thanks to integrated LED display and automated calibration of the protective field width save time and money
- Standardized connectivity for Flexi Loop integration saves installation time and costs
- Enclosure ratings IP65, IP67 and temperature resistance offer long sensor life times and therefore even more efficiency
- Compatibility with numerous SICK safety light curtains makes high flexibility in the application solution possible
- Durable housing
- Simple installation and alignment with the special mounting system
- Quick commissioning of pre-mounting systems, composed of light curtain and housing
- Low downtime thanks to resistance to water and dust due to IP66 enclosure rating
- Highly visible LED status indicator for quick fault diagnosis
- Global availability and support for the entire safety solution

	• Cost-effective machine integration: the miniature design, cascading, and fine stepping of the protective field lengths enable flexible adaptation to the machine design • Standardization saves time and resources by making logistics, order processing, and service more straightforward • Exemplary handling: software-free, almost fully automated commissioning and intuitive operation with sustainable optics • LED-guided start-up together with colored LEDs for quick alignment and unequivocal protective field visualization ensure rapid diagnostics • A continuous protective field for cascade applications eliminates blind zones, reduces the safety distance, and thereby increases productivity		• The small, elegant stainless-steel housing saves space, enables optimum integration into the machine design, and offers great flexibility • Highest level of media resistance for maximum reliability • Efficient cleaning ensures high process and production quality and a low risk of contamination • Efficient ordering process and cost savings due to reduced storage needs and spare parts maintenance • Adjustable brackets ensure the highest availability • Quick on-site diagnostics with LED status indicators over the entire protective field height

- Enclosure rating IP69K offers high resistance and long service life, making it more economical
- Certified material resistance for maximum reliability
- The ideal design for efficient cleaning in the food industry – it ensures high process and production quality while reducing the risk of contamination
- Replaceable protective housing offers flexibility and saves money in the event that service is needed
- Breathable membrane ensures the highest availability
- Reduction of cleaning times and costs compared to a mechanical protective device

- The way the device is assembled – complete with cable and pre-installed within the explosion-proof enclosure – not only saves on installation time but also on certification costs
- Maximum safety and automation in explosive atmospheres thanks to compliance with stringent regulations and strict safety requirements
- Long scanning range facilitates efficient access protection with minimal component requirements
- Straightforward installation and alignment

SICK AT A GLANCE

SICK is a leading manufacturer of intelligent sensors and sensor solutions for industrial applications. With more than 10,000 employees and over 50 subsidiaries and equity investments as well as numerous agencies worldwide, SICK is always close to its customers. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents, and preventing damage to the environment.

SICK has extensive experience in various industries and understands their processes and requirements. With intelligent sensors, SICK delivers exactly what the customers need. In application centers in Europe, Asia, and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes SICK a reliable supplier and development partner.

Comprehensive services round out the offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

That is "Sensor Intelligence."
